Mary Lagier

FRONT END SOFTWARE ENGINEER

About

I am an engineer with 6+ years of professional experience. My strengths are in client facing web app development with a focus on clean and reusable code/components, mobile and cross browser functionality, and product and design team collaboration. I have an eye for beautiful design and a passion for high quality, well built, pixel perfect projects.

Skills

- React, React Hooks, ES6, Redux
- HTML, CSS in JS, SCSS/SASS
- Responsive Development, Cross-Browser Development
- Photoshop, InDesign, Lightroom

For Fun

- I LOVE baking and am renowned for my chocolate chip cookies
- I deeply care about design aesthetics in all areas of my life
- My partner and I love to travel and have a travel blog at tomandmary.travel

Work Background

Team Lead & Front End Engineer
Reflektive | Dec 2017 - Jan 2020

- Team lead of new product vertical from conception to successful product launch including iterative development with beta client feedback. Glimpse of product can be seen here: https://www.reflektive.com/products/performance-suite/11s/
- Significant contribution to reusable component library and establishment of front end patterns in relation to data fetching and storage
- Established best practice expectations for mobile and cross browser development and experience
- Part of small team that completely rebranded entire application (6+ products) without interrupting continued feature development of product teams
- Extensive collaboration with design and product teams concerning new feature development

Experience Engineer
SapientRazorfish | Jan 2014 - Dec 2017

- Developed interactive micro-sites, campaign landing pages, single-page applications and e-commerce sites for large international brands
- Interfaced with clients to develop project timelines, strategies, and risks for technology solutions
- Collaborated with creative teams to translate user experience design into technology solutions

Education & Training

California Polytechnic State University, SLO
Bachelor of Science in Graphic Communications

- Completed in June 2013
- Relevant courses include web development, web design, marketing, typography, brand design and magazine layout design
